PROJECTS

E-Commerce Website Development Using Laravel
Chisinau

Mar 2024 — Apr 2024

Description: Developed a complete online store as part of an individual college project, leveraging Laravel for backend functionality and MySQL for database management. Key aspects of the project included:

- **Frontend Development:** Designed and implemented a user-friendly and visually appealing interface using HTML, CSS, and JavaScript, ensuring an optimal shopping experience across all devices.
- **Backend Development:** Engineered the server-side logic with Laravel, incorporating essential e-commerce features such as product listings, shopping cart functionality, and secure user authentication.
- **Database Management:** Utilized MySQL and phpMyAdmin for database design and management, including product data storage, order processing, and user information security.
- **Admin Dashboard:** Created an intuitive admin dashboard for managing products, processing orders, and overseeing user activities, with role-based access controls and real-time analytics.
- **Deployment and Testing:** Successfully deployed the online store on a web server, performing comprehensive testing to ensure functionality, performance, and security.
